

Stylish Domes and Room in Room Structures for events, congresses and offices

Minimum assembly
and disassembly time

Rooms for 1 to 1000+ people

Optimal acoustics
& sound insulation

No fan noise

Sustainable and circular

THE PANORAMA DOME 8

THE PANORAMA DOME 8

General

The Panorama Dome is an inflatable workshop dome or room and is a round structure with an open roof, available in different diameters. This popular inflatable dome is often used as a subspace or workshop space at trade fairs and conferences. The open roof creates a sense of space inside the dome, while privacy, acoustics and soundproofing are guaranteed.

Applications

The Panorama Domes are very suitable for groups of up to 150 people. The Panorama Dome can be used, for example, as a workshop space, break-out space at conferences or trade fairs, or as a presentation space.

Acoustics And Soundproofing

Due to the round and curved design of the Panorama Dome and the various insulating air layers, this structure has optimal acoustics and soundproofing. This also allows multiple Panorama Domes to be placed next to each other, without sound transmission taking place between the meetings.

The small blower is also completely insulated, so that it cannot be heard at all.

Other Requirements

Only a normal power supply of 220V is required for the installation of the Panorama Dome.

All our domes and structures meet the requirements for fire safety according to the DIN 4102 – B1 standard. The certificate is available on request.

Installation / Dismantling

The Panorama Dome can be quickly installed and disassembled by our team. For example, it is also possible to convert a large plenary hall into a hall with various break-out areas in a short time. For example, a hall can have multiple functions during an event day.

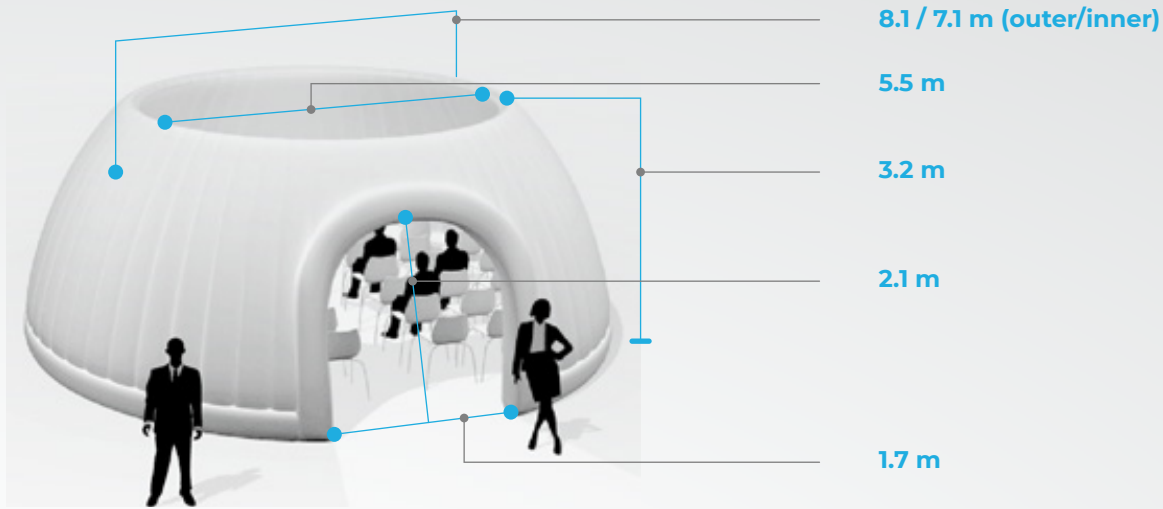

Led and Branding

The Panorama Dome can be illuminated in any desired color by means of our LED bars (also remotely).

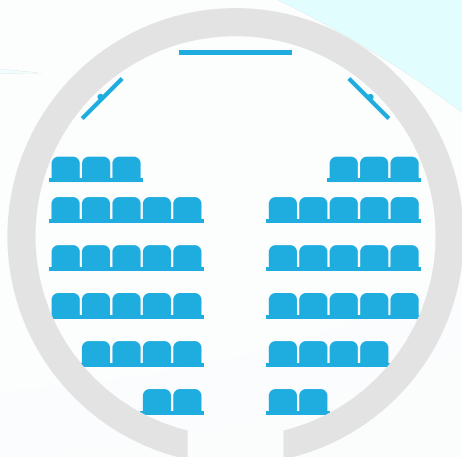

There are also different ways of branding the Panorama Dome. For example:

- Placing banners or TVs in and around the Panorama Dome
- Hanging banners or posters (there are loops at a height of 2 meters both inside and outside the Panorama Dome)
- Projecting logos or other messages by means of projection technique.
- The color of the LED lighting that can display a particular theme.

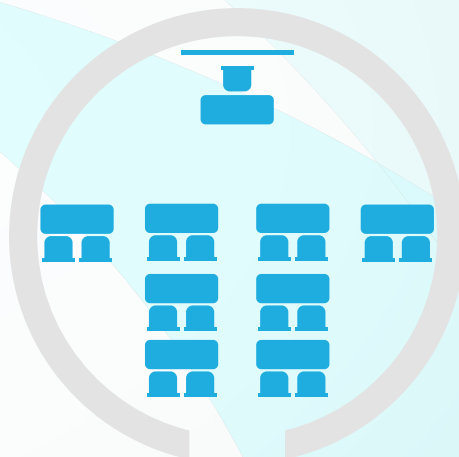

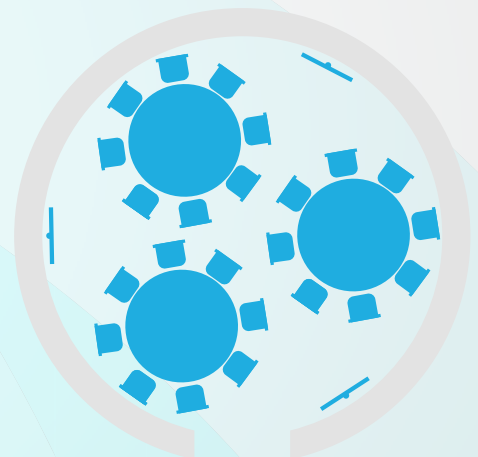

Length outer / inner	Width outer / inner	Height outer / inner	Surface inner	Max chairs	Color	LED	Setup time	Weight	Power
8.1 m 7.1 m	8.1 m 7.1 m	3.2 m 3.2 m	39.5 m ²	40-48	white	RGB bars of 1m	1-2 man hours	45 kg	220v 400w no LED 1000w with LED
